Introducing 517 PRECISIONTRIM

UNVEILED FOR THE FIRST TIME IN ASIA

Ultra-precision slimming that lasts and lasts? Our advanced patented 517 Precision Trim is clinically proven to reduce stubborn fat swiftly by boosting your natural fat-burning abilities at 517 KHz, tested and proven to be the most optimal energy level.

How 517 Precision Trim Works

- 517 Precision Trim stimulates the release of noradrenaline (NDR) through your sense receptors. Noradrenaline acts as a fat mobilizer that releases free fatty acids from fat cells into the bloodstream as pure energy. Visceral (internal) and subcutaneous (external) fats are reduced, so excess bulges are perfectly trimmed away for quick and long-lasting results.
- This localized process bypasses the central nervous system, so your body does not sense the reduction in fat – hence no reabsorption of fat occurs.
